

ASSEMBLY INSTRUCTIONS - ALVERSTONE

1. PREPARATION

- Make sure the crate is empty.
- Open the top zipper to access the inner rods.

2. LOOSEN THE SHORT TOP RODS

- Inside the crate, there are two short rods at the top running across.
- They are fixed at both ends in plastic holders with threads.
- Twist the rods slightly until the connections loosen.
- Pull the rods out of the side frames.

3. FOLD DOWN THE TOP RODS

- After loosening the short rods, you can fold them down.
- This makes the top frame flexible and allows it to be collapsed.

4. FOLD THE SIDES

- Now fold the two long sides of the crate inward.
- Then fold the front and back sides flat as well.

5. FINAL POSITION

- The crate is now folded flat and can be stored or transported to save space.
